A. Read the following text attentively and decide whether the following statements are true (T) or false (F): **20 points**

The Impact of Social Media on Society

Social media has revolutionized the way people communicate and interact with each other, but its widespread use also brings about significant impacts on society. One of the positive effects of social media is its ability to facilitate instant communication and connection across vast distances. People can stay in touch with friends and family, share experiences, and participate in online communities with ease. Moreover, social media has become a platform for expressing opinions, raising awareness about social issues, and mobilizing support for various causes, contributing to the democratization of information and activism.

However, social media also presents challenges and negative consequences. The constant exposure to curated images and idealized lifestyles on platforms like Instagram can lead to feelings of inadequacy and low self-esteem among users. Additionally, the spread of misinformation and fake news on social media has the potential to manipulate public opinion and undermine trust in traditional media sources. Furthermore, cyberbullying and online harassment have become prevalent issues, affecting the mental health and well-being of individuals, especially young people.

While social media offers many benefits, it is essential to recognize and address its drawbacks to ensure a more positive and balanced impact on society.

1. Social media has only positive effects on society.
2. Instant communication is one of the benefits of social media.
3. Social media platforms rarely allow users to express opinions.
4. Social media contributes to the democratization of information.
5. Exposure to unrealistic lifestyles on social media has little impact on users' self-esteem.
6. Misinformation is a concern on social media platforms.
7. Cyberbullying is not predominant on social media.
8. It is important to give attention to the disadvantages of social media for a more balanced impact on society.
9. Social media influences the mental health of individuals positively.
10. The passage suggests that society should ignore the negative consequences of social media.
